

Living Cube in Phantom Grey

“ Choose Lotus. Choose Quality.”

Every aspect of our stoves and fires is designed with quality in mind.

Quality speaks its own language and has its own style. You know it instinctively; you can see it, hear it and feel it.

State-of-the-art combustion systems ensure exceptionally clean and efficient woodburning. Thick ceramic glass provides a breathtaking view of the magnificent flame visuals. Doors shut home with both a reassuring feel and sound, and heavy, cold-rolled steel ensures you can trust your fire to heat your home in even the coldest of winters.

Our stoves and fires are designed to last, which is why they are painstakingly engineered and timelessly styled. Not just to create a beautiful focal point, but to become the warming heart of your home.

TEN YEAR EXTENDED WARRANTY

Your Lotus Expert Retailer will provide you with a Two Year Warranty for your new woodburning stove or fire. This can then be extended to a Ten Year Warranty provided your stove or fire is registered with Lotus. Please see page 46 for details.

EXPERT RETAILER NETWORK

We take great care to ensure that our stoves and fireplaces are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you enjoy years of pleasure from your purchase.

You will find our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your chimney system) and design, and ensure that you select the most appropriate product for your home. They will also be able to advise on or assist with the installation process as well as help provide any after-sales support and servicing of your appliance that you may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from nationwide online sales and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Further, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

Furthermore, Lotus stoves and fires purchased from within our Expert Retailer Network will have the additional benefit of a greatly extended warranty period, subject to terms and conditions. Full details can be found at www.lotusfires.com.

A DANISH ARCHITECT WITH A FLAIR FOR DESIGNING WOODBURNING STOVES.

Since 2001, Lotus has worked closely with architect and cabinetmaker Karl Sølvsten. His love for craftsmanship and materials as well as simple, stylish mode of expression has characterised the design aspect of the company - in close collaboration with our engineers and manufacturers.

Influenced by his experience in traditional Danish craftsmanship as well as his training in architecture at the School of Arts and Crafts and the School of Architecture at the Danish Academy of Fine Arts in Copenhagen, Karl's work has received numerous awards and he has gained recognition as one of the country's pre-eminent architects.

Like us, Karl believes that quality is inextricably linked to the union of functionality, technology and design. He takes a holistic approach to his work, thinking in terms of the whole rather than a series of fragments put together. This shines through the Lotus design process, which endeavours to take all conditions and needs into account to create a product far greater than the sum of its parts.

“Environmentally Designed”

When you choose a Lotus stove or fire, you are making an environmentally friendly choice for you and your family.

All Lotus products are designed for woodburning only. Wood is an environmentally friendly fuel; when burnt, the carbon dioxide released into the atmosphere is approximately the same as that absorbed by the tree during growth. Wood is also a renewable resource, particularly when derived from plantations and cultivated woodland.

For optimum results, we recommend logs should be seasoned for two years or more to achieve a moisture content below 20%. This will not only give twice the heat output to that of freshly felled timber but will also help to avoid a build-up of tar in your flue. Furthermore, if you can obtain hardwood logs this is better still, as they will have a greatly increased calorific value compared to softwoods.

ECODESIGN STOVES

Lotus stoves and fires represent the pinnacle of combustion technology, burning wood with high efficiency and stunning flame visuals. Our products burn so cleanly they meet future Ecodesign air quality standards, set to be introduced in 2022, and are certified with the SIA (Stove Industry Alliance) Ecodesign Ready label.

These stoves and fires feature ultra-clean, high efficiency combustion systems to ensure substances present in smoke emissions such as Carbon Monoxide (CO), nitrogen oxides (NOX), organic gaseous compounds (OGC) and particulates (PM) are minimised when burnt correctly with good quality wood, offering a modern and environmentally friendly heating solution.

APPROVED FOR URBAN AREAS

Selected Lotus stoves and fires are approved for use in Smoke Control Areas. Most town and city homes in the UK are located in Smoke Control Areas as designated by the Clean Air Act. To burn logs in these locations, the model installed must have been granted exemption from the regulations by the government through DEFRA.

This exemption is given only to appliances that have been independently tested to demonstrate particularly clean burning combustion. Your Lotus retailer will be able to give you further help and advice when choosing your stove or fire.

ENERGY EFFICIENCY

Lotus stoves and fires burn with high thermal efficiency. All models in the range are subject to European energy labelling standards and are rated as either A or A+ energy class appliances. For individual energy classes, see product pages.

LOTUS COMFORT ECO BOOST

The innovative Comfort Eco Boost feature makes lighting a Lotus stove easier and more efficient, and is an optional extra available on the Liva, Mira and Prestige models. When activated, a boost of air is supplied to the stove's firebox, speeding up the initial ignition as well as ensuring that newly added logs take even less time to catch fire. Featuring an integrated timer, the Comfort Eco Boost automatically closes the air supply after the pre-set period of time has passed for efficient, eco burning – letting you relax after refuelling your Lotus stove.

- 1 Air is pulled through the vent below the stove and fed directly into the firebox through the Comfort Eco Boost function.
- 2 A gentle pull of the automatic handle opens the Comfort Eco Boost to supply air for the pre-set period of time.
- 3 The Comfort Eco Boost is powered by an easily changeable 9V battery that rarely requires replacing.
- 4 The easy to use timer control allows airflow to be pre-set to be provided for 1-7 minutes.

“ Jubilee 10 ”

COMPACT NORDIC STYLE

Sleek and contemporary, the 4kW Jubilee 10 stoves bring Nordic style into almost any home. The smallest models in the Jubilee range, these stylish woodburners are both shorter and slimmer than the more powerful Jubilee 25 and 35 (pages 10-13), making them perfect for standard sized British rooms and fireplaces. Three models offer various installation options including legs, a wood store and a wall mounted version.

Designed with the Lotus' latest stove innovations, Jubilee 10 stoves benefit from advanced combustion technology, an ergonomic soft-close door system and provision for an optional external air supply. A choice of optional door handles let you further personalise your stove to your suit your tastes.

“Liva”

A RANGE OF EXCEPTIONAL CHOICES

Liva stoves offer a broad range of styles and options, incorporating a number of innovative features such as a soft-close door mechanisms, a cool-to-touch door handle and easy to use air control. There is also the option of upgrading Liva stoves with Lotus's unique Comfort Eco Boost (see page 7) as well as the built-in option of an external air supply to minimise internal drafts.

Presenting a choice of high, medium and low height models to suit a range of interiors, the Liva stove collection even includes the wall mounted 8G for greater installation flexibility*. All Liva stoves are available with side windows for a panoramic flame view, with both 5 and 6 models also offered with steel sides. For ultimate versatility, the 7G can be rotated 180° thanks to its innovative pedestal base and flue connection which feature ball bearings for easy movement, allowing you to angle the stove to face different parts of the room.

“ Living ”

“ We could have made a new stove, but instead we created something entirely different.. ”

Lotus Living – all the qualities of the woodburning stove now in an exquisite and luxurious design. Far from being merely a source of heat, this unique feature fire is a stylish mode of expression which sets a whole new standard for interior design. The Lotus Living is a free-standing fire with an elegant rounded form, exceptional flame picture and high efficiency heat output. The double-layered glass door ensures optimum insulation for better combustion in the firebox.

To extend your interior options, the Lotus Living can be installed with Stovax's various Stove Benches (see page 43 for more information) which create an exciting contrast to the stove's subtle curves.

The Lotus Living is available in a choice of two colours; Phantom Grey and Alpina White (see right).

“Fireplace inserts - a world of possibilities”

Combining outstanding combustion technology with a fantastic view of the flames, Lotus fireplace inserts are an ideal choice if you are looking for a stylish centrepiece and high performance heating.

Lotus fireplace inserts are constructed according to the finest principles of craftsmanship with an exclusive and thoroughly thought-out design and finish that is in a class of its own. The elegant control lever integrates beautifully so nothing interrupts the inserts clean lines; a true testament to Kaare Sølvesten, the architect behind their simple yet refined design.

There are several sizes in the range from the portrait H700 to the widescreen H570W, each offered to expand your styling options and to suit the heating requirements of your home. Further styling options are available with a choice of either steel or Black Magic door and frame options. There is even a double-side model that allows you to enjoy the exciting flame visuals from two rooms at once!

Each of the insert fires is compatible with the optional warm air ducting kit that can distribute some of the fires heat into other rooms to really maximise the heating benefits from this stunning fire range.

“Further Information”

PRODUCT IMPROVEMENT & WARRANTY

Lotus pursue a policy of constant product improvement. Products supplied may therefore differ in specification from those illustrated or described in this brochure, and you should always check the final specification with your Lotus retailer.

Your Lotus Expert Retailer will provide you with a Two Year Warranty for your new woodburning stove or fire. This can then be extended to a Ten Year Warranty provided your stove is registered with Lotus within one month of the later of the purchase date or installation date. Accordingly, the start date for the warranty period is the date of purchase. During the registration process the Expert Retailer details will be required for your Extended Warranty to be activated. Please note, this warranty excludes certain consumable parts and is dependant on your appliance being serviced by an appropriately qualified person 12 months after installation and annually thereafter. Stoves purchased outside of Lotus' Expert Retailer Network will carry a standard 1 Year Warranty. Full details of this warranty is set out to view on our website at www.lotusfires.com.

CARE OF YOUR STOVE OR FIRE

To help you get the best performance from your stove or fireplace and keep it in good condition, Stovax (Lotus' distributor in the UK and Republic of Ireland offers a wide range of cleaning and maintenance products. Stovax also supplies a wide variety of high quality fireplace accessories such as contemporary steel log holders. Your Lotus retailer will be able to give you full details or you can view the complete range at Stovax's website - www.stovax.com.

IMPORTANT INFORMATION

Please note that the installations shown within this brochure may not conform to British and Irish building regulations. Please consult with a qualified professional installer (HETAS registered in the United Kingdom) for expert advice including the requirement for a hearth in your home.

We recommend that a HETAS approved installer should undertake a site survey prior to purchase and it is a requirement that any Lotus stove or fire should be installed by an appropriately qualified HETAS approved installer.

All fires and stoves consume air as they burn. To comply with Building Regulations (Document J) you may need to install a fixed air vent to ensure adequate ventilation. A room vent is not normally required when the air permeability is greater than 5.0m³/hr/m². Your Lotus retailer or HETAS installer will be able to advise on this. You can also download detailed installation instructions prior to purchase from www.lotusfires.com. Furthermore, by law all installations also require a Carbon Monoxide Monitor be present.

Please note that all parts of these stoves, particularly the glass panel in the door, become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm.

STOVAX PROFESSIONAL XQ™ STOVE AND FIREPLACE CHIMNEY SYSTEMS

Lotus recommends the Stovax comprehensive range of stove and fireplace chimney systems, the Stovax Professional XQ™ collection.

Crafted from 304L grade stainless steel for a durable outer finish, the fully sealed components offer water tight protection for the insulation within.

With innovative decorative options, the ability to specify a colour for your system, and with a host of technical advancements such as its Twist-Lock system, the Stovax Professional XQ™ range provides an attractive, versatile and reliable solution for your flue system. Furthermore, the Stovax Professional XQ™ range carries a 10 Year Extended Warranty offering complete peace of mind.

For further information or to request a brochure, simply contact your local retailer or visit www.stovax.com.
