

NEWMAN FIREPLACES INGLEBEAM COLLECTION 2019-2020

# Inglebeam collection

2019 / 2020

## Lynmouth Suite

*Pure style is the only way to describe this stunning suite. The Telford beam in medium oak finish is used in conjunction with our Platinum grey cast brick chamber with honed black granite hearth and rear base. The suite is completed with our FlameView ST1 High Efficiency gas stove. This all new stove has been designed with a large ceramic glass window for the ultimate view, very realistic high definition logs enhanced by the leaping flames all effortlessly controlled by remote control. An up to date stove manufactured to the latest rigorous regulations thus achieving CE approval. Design, gas fire manufacture and assembly made in UK.*

Fire resistant beams manufactured in the uk by craftsmen

# Introduction

Our innovative beams have been designed using formulated materials that have evolved using experience gained since 1929 from family members that started manufacturing fireplaces at this time.

Each individual beam and leg are hand made and meticulously finished by craftsmen of great skill achieving the realism for which our product have become renowned.

Much care has been taken to ensure our beams and leg uprights emulate real wood and this can be seen with our authentic finish which even includes all typical markings you would find in an old wooden beam, including shakes, holes and end grain etc.

The realistic appearance of our beams has not been left to chance as each design has been faithfully reproduced from carefully selected timbers originating from ancient buildings.

Our beams offer many advantages over natural timber beams, including being fire resistant which is very important when most beams are fixed near to a heat producing appliance. There are strict regulations and restrictions relating to the positioning of natural timbers near to hot fires or appliances, our new formulated beams open up a whole new world of fireplace design possibilities. Also warping and twisting that are normally associated with natural wood beams will be a problem of the past.

Our range of designs is expanding rapidly, our talented design team have successfully perfected random stone chambers and random stone pillar fascias, the results are simply stunning, especially when used in conjunction with one of our beam designs. The chambers and fascias will fit many typical chimneys with ease, which usually is not the case with individual natural stone pieces that would require major chimney adaptation to enable the pieces to fit.

Our designs really do create a special ambience, a sight to be enjoyed, just add the flickering candle light and a roaring fire and you will be in another cosy world that will be difficult to resist.

## Important Note

All beams, chambers, hearths and fireplaces etc are only suitable for compatible closed burning appliances. Open burning appliances of any type are not suitable and must not be used.

This brochure is for the sole purpose of showing our range of Inglebeams and cast products, therefore any other product shown within this brochure including, appliances, hearths, stonework, ornaments etc is not part of any Inglebeam or cast product sale. If you are interested in any other fireplace product shown, described or used to compliment an Inglebeam or cast product in this brochure, please contact your retailer for further details.

Any description used to any product is in the view of the editor only and must not be used as a factual statement.

Every effort has been made to show correct colour representation, however no guarantees can be given due to the printing process. Each beam is unique when finished therefore colour and shading will vary. Dimensions are approximate.

All of our products must be installed by suitably qualified, competent and experienced installers complying with all relevant building regulations and any rules in force. All products should be inspected before installation, for quality and damage. No refunds will be given regarding this if the product is installed without customer confirming the goods are of good quality and without damage prior to installation.

Newman Fireplaces Ltd policy is one of continuing improvement, we therefore reserve the right to alter material, design, and specification without prior notice, also we reserve the right to discontinue any product at any time. It is advised you contact your fireplace retailer before surveying and planning your installation who should advise if there are any known changes.
